FOR IMMEDIATE RELEASE

VisiPlex, Inc. introduces the *AlertWave* product line *Wireless Emergency Alert and Mass Notification system*

Vernon Hills, Ill., January, 2007 — VisiPlex, Inc. introduces the most powerful and state-of-the-art wireless mass notification product line that is designed for easy implementation of on-site emergency alert and response operations. Utilizing its superior wireless communication technologies, the AlertWave product line can provide an effective means of audible and visual notification for virtually any facility, regardless of size.

Through instant, well-directed live or pre-recorded voice messages, the AlertWave system instructs people how to proceed in a variety of emergency situations. The AlertWave system can operate as a stand-alone unit, or be integrated with other existing facility systems as fire/alarm, access control, biological & chemical detection, public address systems and more.

During regular daily activity and non-emergency situations, the AlertWave system can function as a powerful wireless PA and messaging system, with multiple indoor/outdoor zones and has the ability to communicate with each specific zone or PA speaker individually.

The AlertWave system advantages:

- **Wireless indoor/outdoor emergency mass notification**
- **Wireless PA messaging to improve communications and efficiency**
- **Easy system expansion and installation**
- **Programmable schedule for event notifications and alerts**
- **'Hot Standby' backup transmitters and secured communication options**

The AlertWave system is ideal for college campuses, government facilities, city municipalities, counties, military bases, schools, commercial plants, transportation hubs and industrial complexes, allowing personnel to have complete control without having to rely on outside third parties.
